

## Let us help you achieve your digital dentistry goals~

### Scanning technology

Go model free by sending us your STL files. We accept files from all major scanning systems including 3Shape TRIOS®, iTero®, CEREC®, 3M™ True Definition, Medit, and more. With the help of our 3Shape and Exocad software, we can fabricate single crowns in as little as 4 days.

### Paperless technology

Go paper-free by utilizing DDX, a free cloud-based program that streamlines lab prescription workflow, improves communication, provides access to statements and invoices, and helps keep patient information safe and secure. In addition, we offer digital services through the home page of our website: digital case submission, pick-up requests, and supply requests.
