

## *Removables...*

Shikosha's Removables Department provides the full range of removable appliances from mouth guards to partial frames and full acrylic dentures. In addition, our Implant and Removables Teams work together closely to provide advanced implant-denture hybrid solutions.

Because our products are manufactured on-site in Portland, Oregon, we are able to provide **same-day relines and basic repairs** to local clients.

### Removables Team

Our Removables technicians are experts in modern denture mechanics and technology. Our Removables Supervisor and long-time removables specialists have decades of combined experience and enjoy working with their team and our clients to create the most optimal results possible.

*Smiles are what we live for.™*
