Shikosha Dental Lab Quarterly Newsletter: Summer 2017

JOIN US IN WELCOMING JIM KINSEY!

You may have heard by now that Jim Kinsey has joined the Shikosha team as the Technical Support Specialist. We have created this vital new role to better support our doctors with case planning and technical questions.

Some of you may remember Jim from when he worked at Shikosha in a similar role during the 90s. Since then, he has worked in management positions at Shofu, Sirona, and Novadent (ADT), and he returns to us with a total of 42 years of experience in dental lab management, technical support, and quality improvement, making him a valuable asset and welcome addition to our team.

Shikosha's mission is to provide our customers with the highest-quality products and services and to change your patients' lives for the better. We are committed to supporting you and the growth of your practice and are excited that Jim's presence will improve our ability to do so!

Please join us in welcoming Jim Kinsey to Shikosha Dental Lab! He can be reached by email: jim.kinsey@shikosha.com, office phone: (503) 238-7117, or cell: (503) 318-4735.

SPOTLIGHT PRODUCT: MILLED BAR HYBRID

Milled bar hybrid restorations are made up of four to six implants that are fabricated on a milled bar. The milled bar restoration is then screwed into place, providing a solid design with little to no movement.

Benefits include

- Can be fixed or attached/removable
- Greater stability
- Some have passive attachments that snap into place
- Often doesn't require a flange

Call us to learn more about our milled bar hybrids! 503-238-7117. To get **\$100 off** of your next milled bar case, visit our blog post, print off the coupon (if you haven't already received one), and send it in with your case. Offer is valid through July 31st, 2017.

Shikosha Dental Lab is a certified, full-service dental lab serving the greater Northwest for over fifty years. Our products are made in-house in Portland, Oregon.

PFM Upper & Lower Designed with CAD

The dental world entered the digital age long ago, and at Shiksha Dental Lab, we strive to incorporate digital technology into as many areas of our lab as we can. This PFM upper and lower case was designed and milled using 3Shape CAD Design software.

For more pictures from this process, please take a look at our blog post: www.shiksha.com/shiksha-news/pfm-upper-lower-designed-with-cad

FALL CE COURSES COMING SOON!

Advances in Screw-Retained Implant Restorations, Esthetics, and Tissue Management

Date: Thursday, November 9th

Time: 6:00 pm - 8:30 pm

Location: Shiksha dental Lab
